FLUORIDE REFERENDUM PETITION

To: The Honourable the Speaker and Members of the Legislative Assembly of NSW

Re: The petition of residents of the State of New South Wales draws to the attention of the House

(1) the NSW Government's acknowledgement that water fluoridation is unethical mass medication without the express consent of the community, and that Referendum guarantees consent;

(2) the precedent set by Deniliquin Council in providing and installing free Reverse Osmosis Filters for people with medical certificates stating that they were at risk from fluoridated water.

Your petitioners therefore request the House to:

(1) place a moratorium on the addition of fluoride chemicals to NSW public water supplies until such time as a statewide Referendum on fluoridation is held.

(2) provide full rebates for purchase and installation of Reverse Osmosis water filters for people providing medical certificates stating that they are at risk from fluoridated water.
